

کاتالوگ درب چوبی 2019

Entrance Doors

Their 2 1/4-inch thickness exceeds the industry's standard. We offer a vast choice of models which can be harmonized with both contemporary and traditional styles.

Each entrance door model has an automatic multipoint lock system offering the ultimate in security. Our doors' uniquely designed sill provides a double drainage system which ensures superior air and water tightness as well as longevity.

In conclusion, our doors' well-crafted design and finish will add a unique touch to your home.

Lacquered Doors (Clear/PU/UV)

Three different types of lacquered doors are available. These are UV lacquered door, PU lacquered door and Clear Lacquered door. Lacquer is used for surface protection of doors. All lacquers are scratch resistant, UV lacquer gives high glossiness and high protection from UV ray of sunlight and protects timber shade for long time.

Complete Door Unit

Door & Door Frame

Door Frame

Door Frame: We generally make door frames of Jarul wood. Logs are selected and purchased by company's timber experts directly from Myanmar. Before manufacturing of Door Frames the sawn planks are naturally seasoned.

Planks from Jarul tree are among the most suitable timber for strength, durability, beauty, resistance to wear and tear.

Other Timber Options :

MAHOGANY, CHAMP

*Subject to availability of stock.
